About Us

Our Purpose

One of our greatest responsibilities is to prepare the next generation to meet the challenges they will

face in the 21st Century, with a deep commitment to the rights and responsibilities of U.S. citizenship. We have a unique opportunity for a community dialogue about the civic values, knowledge, and skills that K-12 students should learn and practice in our public school system. We will create strong community support for our schools to provide effective civic education for students to be successful in college, career and citizenship.

Our Mission

The mission of the Civic Education Center is to restore civility in America by creating opportunities for youth to learn and practice civic values and democratic skills.
