Dear Sir,

On May 30, 2023, we met during the 2023 AGM in Taipei, discussing the environmental disaster caused by Formosa Ha Tinh Steel Corporation in Vietnam. We proposed a just solution, including fair compensation for the victims, thorough cleanup, independent survey, and medical examinations.

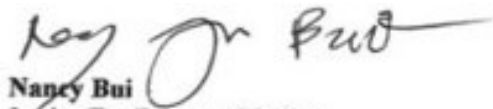

However, it has been over three months without a response. We urge you to honor your promises and take swift actions to bring justice to the victims. Let us work together for a better future.

Should our demands remain unmet, we want to express that we will be left with no choice but to pursue further legal actions against Formosa Plastic Group and its subsidiaries in competent courts, including US Courts. Additionally, we are prepared to take more drastic measures, such as conducting a hunger strike, to bring attention to this ongoing ordeal that has lasted over seven years.

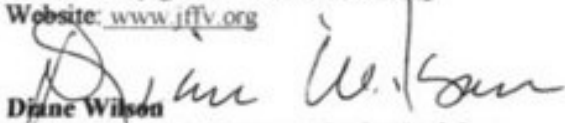

We sincerely hope it does not come to this. Instead, we hope for a cooperative effort to find a just and equitable resolution for the victims, allowing them to regain their lives and dignity.

Sincerely,

Signed on behalf of IMFA,

Nancy Bui
